TABLE OF CONTENTS
THE ESSENTIALS OF CALCULUS
WITH EARLY TRANSCENDENTALS

UNIT 0 REVIEW 1

0.1 Slopes, Lines, Calculator Review 1
0.2 Functions, Inverses, Graphing Adjustments 3
0.3 Intercepts, Symmetry, Even/Odd, Intersections 10
0.4 Review of Basic Trigonometry 14
0.5 Trigonometry with a Calculator, Graphs of Trigonometric Functions 18
0.6 Exponential Functions 22
0.7 Logarithmic Functions 24
Additional Practice 28
Unit 0 Summary 30

UNIT 1 LIMITS, CONTINUITY 34

1.1 Limits, Continuity 34
1.2 More Limits, More Continuity, Intermediate Value Theorem 38
1.3 Infinite Limits, Limits at Infinity 41
1.4 Curve Sketching 45
1.5 Rate of Change, Squeeze Theorem, Other Limits 48
1.6 Review 51
Unit 1 Summary 54

UNIT 2 DIFFERENTIATION 55

2.1 Limit Definition of the Derivative, Alternate Form of the Limit Definition 55
2.2 Derivative Rules (Short Cuts), Tangent Lines, Nondifferentiability, Rate of Change 58
2.3 Calculator Differentiation, Derivatives of Sine, Cosine, Exponentials, Logs 63
2.4 Position, Velocity, Acceleration 67
2.5 Product and Quotient Rules 71
2.6 Derivatives of Tangent, Cotangent, Secant, Cosecant 74
2.7 Review 76
Unit 2 Summary 78

UNIT 3 DIFFERENTIATION: COMPOSITE, IMPLICIT, INVERSE FUNCTIONS 79

3.1 The Chain Rule 79
3.2 Chain Rule with Exponentials and Logs Including Bases Other Than e 81
3.3 Implicit Differentiation 84
3.4 Related Rates 87
3.5 Inverse Functions 91
3.6 Inverse Trig Definitions and Differentiation 94
3.7 Review 98
Unit 3 Summary 100

UNIT 4 APPLICATIONS OF DIFFERENTIATION 102

4.1 Approximating with the Tangent Line 102
4.2 L'Hospital's Rule 105

4.3 Absolute Extrema and the Mean Value Theorem 108
4.4 Increasing/Decreasing Functions, First Derivative Test for Relative Extrema 112
4.5 Concavity and Points of Inflection, the 2nd Derivative Test for Relative Extrema 115
4.6 Review 119
Unit 4 Summary 121

UNIT 5 MORE APPLICATIONS OF DIFFERENTIATION 122

5.1 Curve Sketching with Extrema and Points of Inflection 122
5.2 Graphing Derivatives and Antiderivatives from Graphs 125
5.3 Using Graphs of the First Derivative with Justification 128
5.4 Max/Min Applications (Optimization) 131
5.5 More Max/Min Applications 134
5.6 Review 136
Unit 5 Summary 139

UNIT 6 INTEGRATION 140

6.1 Antidifferentiation, Indefinite Integrals 140
6.2 Antidifferentiation of Exponentials and Trig Functions 145
6.3 Reverse Chain Rule for Integrals and *u*-Substitution 148
6.4 The Fundamental Theorem of Calculus, Definite Integrals, Calculator Integration 152
6.5 The Second FTC, Integration Involving Natural Log Function 157
6.6 Integration Involving Inverse Trig Functions, Advanced Integration Techniques 160
6.7 Riemann Sums to Approximate Definite Integrals 163
6.8 Trapezoidal Approximations, Summation Notation 167
6.9 Review 172
Unit 6 Summary 175

UNIT 7 DIFFERENTIAL EQUATIONS 176

7.1 Solving Differential Equations, Verifying Solutions 176
7.2 Exponential Growth and Decay 180
7.3 Slope Fields 184
7.4 Review 189
Unit 7 Summary 192

UNIT 8 APPLICATIONS OF INTEGRATION 193

8.1 Average Value of a Function, Interpretation of "Rate" Graphs 193
8.2 Area Between Curves 198
8.3 Volumes of Solids with Known Cross Sections 201
8.4 Volumes of Solids of Revolution: Discs and Washers 204
8-5 Review 208
Unit 8 Summary 211

APPENDIX A 213

A-1,2 Shell Method Volume 213
A-3,4 Integration by Parts 217

Answers to Selected Exercises 219

Index 247
